PERSONAL PROJECTS

ITSWSCRM
- Developed an Employee Management and Attendance System with features like Punch-In, Face Detection, and QR-based attendance.
- Implemented a secure PIN-based attendance system for employees.
- Built multiple modules including Leave Management, Task Assignment, Holiday List, and Leave Approval.
- Designed three login roles: **Admin, HR, Employee**
  Admin: Manage all employee records, attendance, leaves, approvals, and tasks.
  HR: Add/manage employees, handle attendance, leaves, and salary management.
  Employee: View attendance, leaves, holidays, and leave approvals.

Virinoo
- Created a mobile application for job seekers to search, apply, save jobs, and upload resumes.
- Designed and developed the app as a **Naukri.com clone** with user-friendly UI and smooth navigation.

Elogistics - Packers and Movers App
- Built a mobile application for relocation services including **Home Shifting, Office Shifting, Bike & Car Transport**.
- Implemented quotation generation and lead management system.
- Designed it as a complete **CRM-based logistics solution**.

VacancyExpert
- Developed a job portal application to help users find jobs easily.
- Implemented advanced logic and modules for job search, applications, and user profile management.
- Enhanced user experience with smooth functionality and intuitive design.
